DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-24, drawn to credit or identification system, classified in class 235, subclass 380.
 - II. Claims 25-44, drawn to mechanized store, classified in class 235, subclass 383.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Group I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I is generally related to a system for facilitating financial transaction incorporating biometric information of a user and Group II is related to a system for facilitating POS terminal including a surveillance tag associated with one or more products. The subcombination has separate utility such as a self-checkout terminal.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Sylva on August 2, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2876

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
